

This service is one that I pay for on a monthly basis. I understand that traditional broadcast outlets may feel that local information off a satellite is unfair. Unfortunately, this service is one that is not governed by the FCC and never should be. I can understand why the FCC may want to dip their hands in due to financial circumstances, but telling a broadcasting body that is not governed by the government that all of a sudden it is going to be governed is against the constitution. I feel very strongly that the FCC has enough say in what I can and cannot listen to! They have already made it impossible for a favorite radio personality of mine to stop broadcasting in my city. I never thought the day would come.

My comments may not carry much weight, but I will boycott any satellite radio in response to any government interference of any kind. Then the the satellite companies will have ground to file legal action against the FCC and hopefully will result in legislation that keeps the FCC out of satellite radio.
